

JACOB PETERSON

I am a trained ecologist with experience working in both ESRI and opensource GIS platforms. Through my academic pursuits, I have also gained considerable experience in a variety of statistical methodologies. I enjoy exploring datasets and solving the puzzle that comes with analysis and getting the data to answer useful questions.

I am currently looking for a data science position that allows me to visualize and solve pragmatic problems using my skills in GIS and statistical analysis.

EDUCATION

- Present
|
2020
- **M.Sc., Applied Statistics and Analytics**
University of Kansas Medical Center  Overland Park, KS
 - Emphasis: Data Science
- 2018
|
2016
- **M.Sc., Natural Resources Ecology and Management**
Oklahoma State University  Stillwater, OK
 - Thesis: Examined the effects of the Conservation Reserve Program and anthropogenic structures on the long-distance movements of *Tympanuchus pallidicinctus*
 - Experience applying mixed-effect regression models and a variety of spatial movement and selection models.
 - Authored publications for peer-reviewed journals.
- 2015
|
2012
- **B.S., Fish, Wildlife and Conservation Biology**
Colorado State University  Fort Collins, CO
 - Minor: Spatial Information Management (SIM)

RELEVANT EXPERIENCE

- 2019
- **Research Assistant**
Purdue University  West Lafayette, IN
 - Began development of an agent-based model to estimate the effectiveness of chronic wasting disease management methods on *Odocoileus virginianus*
 - Continued education by taking graduate level coursework in statistics and data science
- 2019
|
2016
- **Student Consultant**
Oklahoma State University and Purdue University
 - Worked unofficially as a consultant for GIS and R within my graduate school departments helping other students, post docs, and research staff improve their R programming skills, tidy data and manage data with unit tests, and perform statistical and spatial analyses.
 - I have led help sessions one on one, within small working groups, and given detailed presentations about new techniques to lab research groups and graduate level classes.
- 2016
|
2015
- **Field Technician - White-tailed Deer Capture**
Missouri Department of Conservation  Rea, MO
 - Assisted in the capture and tagging of adult and neonate deer.
 - Used VHF and Iridium GPS telemetry to monitor individual survival and movement patterns.

SKILLS

Highly experienced with

 Program R
 ArcGIS
 Linux/Bash
 R Markdown

Experience with

 Python
 SQL
 QGIS
 Netlogo

PROFESSIONAL COMMUNICATION

I have given talks about my graduate research at five professional conferences in the last two years.
I currently have two scientific articles up for peer-review in professional journals.

MORE INFO

See full CV at
github.com/jacpete/Resume_CV/cv_Peterson.pdf for more complete list of positions and experience.

Last updated on 2020-01-01.

- 2015
|
2012

Human Dimensions Technician
 Colorado Parks and Wildlife

Fort Collins, CO

 - Worked on a variety of interdisciplinary projects in social science and natural resources to create summary reports for survey data, literature reviews, statistical and spatial analysis of survey response data, and designed and managed Access and ESRI geodatabases.

- 2015

GIS & Human Dimensions Independent Study
 Colorado Parks and Wildlife & Colorado State University

Fort Collins, CO

 - Began development of a method to spatially model and predict human attitudes and tolerance to black bears using survey response data.
 - Experience using SQL to interface with a database and Python & R to script a spatially-explicit model.

- 2015

NSF - Research Experience for Undergraduates Fellow
 University of Kansas

Lawrence, KS

 - Used SQL and R to parse a 150 year-old fish stomach database to create a food web for the North Atlantic Ocean and test for correlation in these interspecific relationships with meta-population synchrony.

- 2014

Field Technician - Mule Deer Neonate Capture
 Colorado Parks and Wildlife

Piceance State Wildlife Area, CO

 - Assisted in the capture and tagging of neonate deer.
 - Used VHF and Iridium GPS telemetry to monitor individual survival and assess cause of mortality.

- 2014

Predictive Model for Archeological Sites Affected by Flood Damage
 SIM Minor Capstone Project (CSU)

Fort Collins, CO

 - Designed a predictive model to locate prehistoric and historic cultural archeological sites using spatial predictors with ArcGIS and python scripts.

SPECIAL INTERESTS

Continued Learning - I am always in search of new methods, code libraries, and ideas that could increase the efficiency or statistical rigor of analysis.

Scientific communication - I enjoy explaining complex problems, statistical analyses, and their results to non-specialists.

FOSS - I am an advocate of free and open source software solutions that are easily accessible for others to use and learn from.
